

Zulkariski Mauladi

Frontend Engineer | Experienced in Vue/Nuxt.js Ecosystem | UI/UX Enthusiast

mzulkariski@gmail.com | [\(+62\) 899 8714 238](tel:+628998714238) | Depok, West Java, Indonesia | [LinkedIn](#) | [Github](#)

Summary

Frontend Engineer with 4+ years of experience, having built 4 internal web applications, improved store operational efficiency by up to 70%, and earned a promotion to Senior Staff in under 2 years. Specializing in the Vue.js ecosystem (Vue 2/3, Nuxt) and modern UI development with TailwindCSS.

Focused on scalable, high-performance SaaS platforms and POS systems with clean architecture and seamless API integration. Adept at translating business requirements into production-ready web applications through close collaboration with cross-functional teams.

Experience

PT. Metrodata Electronics Tbk. East Jakarta, Indonesia
Frontend Engineer, Application Developer Assc. (On-Site, Contract) Nov 2022 - Nov 2025

- Vendor-side engineer assigned to client **PT. Jasamarga (Persero) Tbk** as a **Frontend Vue Specialist** for toll road web applications.
- Owned the frontend across development, testing, and post-deployment support, reducing UI bugs reported by an estimated 30–40% per sprint.
- Collaborated with SA and Backend to resolve UI/UX issues and simplify workflows, helping operators complete daily tasks around 15–20% faster.

Upvendo (The Mazi Group) Miami, Florida
Frontend Engineer (Remote, Freelance) Jun 2024 - Aug 2025

- Built and maintained modular **SaaS POS apps (KIOSK, Online Ordering, Backoffice)** using Vue 3, enabling faster onboarding and setup for new merchant outlets (≈30–50% faster).
- Translated Figma designs into reusable, production-ready UI components and proposed UX improvements, cutting design/development rework by roughly 20–30%.
- Optimized RESTful API integrations and responsive layouts, reducing visible API errors and layout-related tickets while improving load times for core transaction screens by about 20–25%.

Sarirasa Group (CV. Sarirasa Nusantara) Central Jakarta, Indonesia
Frontend Developer (On-Site, Full-Time) Feb 2021 – Nov 2022

- Built 4 internal web applications to digitize restaurant operations, contributing to promotion to Senior Staff in under 2 years.
- Developed a web-based POS for Sate Khas Senayan that streamlined cashier workflows and reporting, improving store operational efficiency by up to 70%.
- Delivered responsive, cross-browser UIs for internal tools, reducing display/compatibility complaints from outlets and accelerating adoption across multiple branches.

Education

Indraprasta PGRI University Bachelor of Computer Science • 3.09 IPK/GPA
Information Technology East Jakarta, Indonesia • Jun 2016 - Sep 2020

Languages

English Indonesia
Upper Intermediate (B2 – EF SET) Native

Skills

Languages & Frameworks

HTML5, CSS3, JavaScript, TypeScript, Vue.js (2/3), Nuxt.js, Next.js, Solid.js, Express.js

jQuery, Bootstrap, Tailwind, Vuetify, Mantine, Vuex, Pinia, Axios, Vue-Meta, Vite, Stripe, ofetch

Specializations

POS System, Responsive Design, Convert UI/UX designs, Component-Based, Restful APIs, SEO, SaaS

Projects

CheckSSLBot – SSL Certificate Monitoring Dashboard

Apr 2025 - Apr 2026

Built a Vue, Pinia, and Tailwind-based web app for automated SSL monitoring across multiple domains and subdomains. Designed intuitive dashboard with pricing comparison and email alerts for certificate expiry.

EPL Module (Environment Planning System) – JIMMS SuperApp

Sep 2024 - Nov 2025

Built a Next.js app using Mantine, SWR, and Axios to digitize toll road maintenance inspections and centralize bridge/road condition data into a single dashboard integrated with JMTM's smart maintenance ecosystem. Converted PowerPoint-based into an interactive web app and collaborated via JIRA for feature planning-delivery.

SaaS POS System - Upvendo

Jun 2024 - Aug 2025

Built interconnected applications (kiosk.upvendo.com, zestidoo.com, backoffice.upvendo.com) using Vue 3, Vuexy, and TailwindCSS. Implementing production-ready UI/UX designs and REST API integrations.

Company Profile Website (CSIRT Needs) – PT. Jasa Marga Tbk.

Feb 2023 – Feb 2025

Implemented Vue-Meta for SEO, dynamic page management via CMS, and interactive map/email features. Collaborated with UI/UX team for responsive, accessible interface.

JMGuest (Guest Book WebApp)

Oct 2023 - Aug 2024

Developed a guest registration system with KTP camera scanning, photo capture, CRUD, search, and Excel export, supporting multiple guest types with customizable forms.

Sarirasa WebPOS (Web based Point Of Sale system)

Feb 2021 - Aug 2022

Developed Cashier, Kitchen, Online Ordering (Connect) and Dashboard Management System for Sate Khas Senayan (*One of the Sarirasa Group brands*) to enabling efficient sales, reporting, and daily monitoring.

Certifications
