

Zulkariski Mauladi

Frontend Engineer | Vue/[Nuxt.js](#) | POS & SaaS Platform

Engineer with 4+ years of experience building SaaS and POS web applications using Vue.js (2/3), Nuxt, and TailwindCSS. Successfully developed 4+ internal tools and POS systems, improving store operational efficiency by up to 70% and earning a promotion to Senior Staff in under 2 years. Looking to contribute my frontend expertise to scalable, high-performance web platforms in an international environment.

Education

2016 – 2020 Bachelor's Degree – Computer Science
Indraprasta PGRI University
GPA 3,09

Experiences

Nov 2022 – Nov 2025
East Jakarta, Indonesia

Frontend Engineer, Application Developer Associate (Vendor-side)

PT. Metrodata Electronics Tbk / PT. Jasamarga (Persero) Tbk

- Vendor-side Frontend Vue Specialist for toll road web applications at PT. Jasamarga (Persero) Tbk. Owned the frontend across development, testing, and post-deployment support, reducing UI bugs reported by an estimated 30–40% per sprint.
- Collaborated with system analyst and backend engineers to resolve UI/UX issues and simplify workflows, helping operators complete daily tasks around 15–20% faster.
- Contributed to setup CSP, SEO-ready company profile and internal web tools.

Jun 2024 – Aug 2025
Miami, US (Remote)

Frontend Engineer (Freelance)

Upvendo (The Mazi Group)

- Built and maintained modular SaaS POS applications (KIOSK, Online Ordering, Backoffice) using Vue 3, Vuexy, and TailwindCSS, enabling faster onboarding and setup for new merchant outlets (≈30–50% faster).

- Translated Figma designs into reusable, production-ready UI components and proposed UX improvements, cutting design/development rework by roughly 20–30%.
- Optimized RESTful API integrations and responsive layouts, reducing visible API errors and improving load times for core transaction screens by about 20–25%.

Feb 2021 – Nov 2022
Central Jakarta, Indonesia

Frontend Developer (Full-time)

Sarirasa Group (CV. Sarirasa Nusantara)

- Built 4 internal web applications to digitize restaurant operations and developed a web-based POS for Sate Khas Senayan, improving store operational efficiency by up to 70%.
- Delivered responsive, cross-browser UIs for internal tools, reducing display/compatibility complaints from outlets and accelerating adoption across multiple branches.
- Contributed to modules such as Cashier, Kitchen, Online Ordering, and Dashboard Management System.

Projects

Jul 2025 – April 2026

Frontend Developer

CheckSSLBot – SSL Certificate Monitoring Dashboard

Tools: Vue 3, Pinia, TailwindCSS

Built a Vue, Pinia, and Tailwind-based web app for automated SSL monitoring across multiple domains and subdomains with pricing comparison dashboard and email alerts for certificate expiry.

Sep 2023 – Sep 2026

Frontend Engineer

EPL Module (Environment Planning System) – JIMMS SuperApp

Tools: Next.js, Mantine, SWR, Axios

Digitized toll road maintenance inspections and centralized bridge/road condition data into a single dashboard integrated with JMTM's smart maintenance ecosystem; converted PowerPoint workflows into an interactive web app.

Sep 2023 – Sep 2026

Frontend Developer

SaaS POS System – Upvendo

Tools: Vue 3, Vuexy, TailwindCSS, REST APIs

Built interconnected applications (kiosk.upvendo.com, zestidoo.com, backoffice.upvendo.com), implementing production-ready UI/UX designs and robust API integrations for merchant operations.

Sep 2023 – Sep 2026

Frontend Developer

JMGuest (Guest Book WebApp)

Tools: Laravel, Vue.js, Bootstrap, REST APIs

Developed a guest registration system with KTP camera scanning, photo capture, CRUD, search, and Excel export, supporting multiple guest types with customizable forms.

Oct 2021 – Oct 2023

Frontend Developer

Sarirasa WebPOS

Tools: [Vue.js](#), Figma, Bootstrap, TailwindCSS, REST APIs

Developed web-based POS modules for Cashier, Kitchen, Online Ordering, and Dashboard Management System for Sate Khas Senayan to enable efficient sales, reporting, and daily monitoring.

Certificates

2025 – 2026	EF SET English Certificate 58/100 (B2 Upper Intermediate)
2024 – 2025	Frontend Developer Certificate – Dicoding Indonesia
2023 – 2025	Certificate of Completion – Skilvul (Challenge: Crowde - Farmer Capital Application)
2023 – 2024	UI/UX Design Professional Certificate – Skilvul & KOMINFO
2021 – 2022	UI/UX Design Mastery (Course Completion) – Skilvul
